

Field Application Scientist m/f

upcyte technologies is a life science company specialized in the controlled, scalable propagation and standardization of human primary cell products. upcyte technologies has developed unique cell proliferation platforms that form the basis for novel cell-based research and drug development tools in the pharmaceutical industry.

Your responsibilities

With your home base in Hamburg you will be supporting existing and prospect customers within Europe to implement and use our upcyte® cell products and help to establish upcyte's products in the market.

This includes

- Introducing new and existing products to our customers in order to generate sales.
- Presenting upcyte's portfolio at exhibitions and conferences.
- Processing orders and transferring it to the laboratory.
- Providing technical implementation and support on-site at the customer.
- Supporting our development team to identify new applications.

Your qualifications

- You hold a Bachelor or Master's degree in the life science domain.
- You have technical expertise in cell based applications, preferably with hepatocytes.
- Applicants with experience in customer support or sales are preferred.
- You are willing to travel frequently and to stay off-site for several days.
- You have a keen perception and can present complex topics with conviction.
- You have excellent communication skills and are fluent in English and German.
- You are self-motivated and willing to improve yourself further.

At upcyte you'll be joining a young and spirited team. You'll have the opportunity to become an expert for an innovative product portfolio and an accepted advisor for our industry customers. Please send your convincing application including your salary expectations and your earliest possible starting date to info@upcyte.com.
